

## Giant Raised Planters

Perfect for all age and ability groups

Welcome to our Spring Newsletter. After a very cold winter, especially with the snows blown in from Siberia, we are all hoping for a great spring and early summer to enjoy the joys of gardening.

Product Designer Duncan McInnes

Product Designer Duncan McInnes grew potatoes in his raised planter this time last year, "I was delighted with the crop" said Duncan, "and the taste". "It just shows what you can grow in our raised planters, and I was delighted to see later in the year others growing carrots, beetroots, tomatoes and many other vegetables, fruits and herbs". "The response we have had from our customers has been terrific.". "We are all looking forward to a great year of growing. In the meantime, have a great spring and enjoy your garden4me raised planters"!

EVENTCITY  
MANCHESTER  
15TH – 16TH  
JUNE 2018

Why not come and see us at **RHS Chatsworth Show June 6th – 10th** or **RHS Tatton show July 18th – 24th**. We will be showing a full range of colours and offering advice on great things to plant.

### **Maria Goretti Foundation**

The Maria Goretti Foundation in Ireland has taken delivery of 8 garden4me planters. The facility provides a holistic service, supporting both child and family, in a home from home environment for children, with Autism, intellectual disability or physical and sensory disabilities.

### **Growing Your Own**

The number of people growing their own food is increasing all the time; the desire for a healthier living style and a clearer understanding of where their food is coming from are key drivers, and garden4me raised planters are the perfect support for those following this path. With a 10 inch depth growing bed throughout it is perfect for growing all manner of root vegetables, as well as fruits and herbs, and the built in self-regulating reservoir is a unique feature to help deliver great growth and healthy plants.

**Why not see what you can grow in your garden4me planter by looking at our videos:**  
[www.garden4me.co.uk/our-videos/](http://www.garden4me.co.uk/our-videos/)

We are delighted to announce the launch of our brand new garden4me raised planter in Purple. It adds another vibrant colour to the range to complement the Green, Yellow, and three Granite colours we already have in the range. The early response has been really positive and we look forward to seeing photos with it fully planted.

### **Growing Pockets**

For those of you who don't know, we also produce a bespoke set of growing pockets to fit into our raised garden planters.

These are perfect for those who want to create distinct growing plots, and are especially popular amongst our herb growing customers who are able to separate roots to keep the more invasive varieties such as mint away from the other plants.

The growing pockets fit into specially designed grooves within the walls of the planter so they are stable and robust. You can see the growing pockets in the photo of our new purple planter on the left.

**Garden4me planters will be a part of the Bloom Show in Dublin 31st May to 4th June on the SEED stand**

Garden4me raised planters are perfect for those wanting to grow herbs. Many of our customers are growing and enjoying a wide variety of plants to use in their cooking.

## Perfect for Patios

Garden4me raised planters are perfect for patios. They provide you with the perfect opportunity to develop and grow a genuine garden space, and you can complement them by placing other pots around them to create a truly beautiful garden. It doesn't matter what size your patio is, with a garden4me raised planter you can create your perfect garden.

**You can follow garden4me on all the main social media channels – Twitter, Facebook and Instagram. Follow us @garden4me\_**

**Why not check out our monthly calendars full of handy hints and gardening tips [www.garden4me.com](http://www.garden4me.com)**

**Bees play a key role in our gardens, particularly in the vegetable plot and in pollinating flowers which would be unable to produce seed without them**

### **Growing plants to support wildlife has never been more important**

There is a growing understanding that the bee and butterfly population is in serious decline. The reasons for this are hotly debated, with phone masts and the use of pesticides being widely cited as the main reasons. Regardless of the cause, we can all do our bit to support bees and butterflies by growing 'bee friendly and butterfly friendly' plants.

Most major garden centres and growing websites now identify plants which are 'bee and butterfly friendly', and the plants themselves are often vibrant in colour, appearance and fragrance and make the most fantastic gardens – with the big bonus of supporting nature.

### **Great for Schools**

Our garden4me raised planters are perfect for growing bee and butterfly friendly plants. They are perfect for schools, pre-school, nurseries and playgroups enabling children to learn about nature and the environment and at the same time to develop their own gardening skills.
